Medical expertise for longer, healthier, more vibrant lives.

LONG-FORM BIOGRAPHY

A career built around the heart

Clinical leadership, prevention, education and public understanding

Dr. Stephanie A. Moore, MD, FACC, FACP, is a board-certified cardiologist specializing in cardiovascular disease and advanced heart failure, with clinical interests in heart transplantation and ventricular assist devices. She serves as Medical Director of the Advanced Heart Failure Therapies Program at UofL Health in Louisville, Kentucky.

Across more than 25 years in cardiology, Dr. Moore has worked within academic medical centers, federal health systems and specialized heart-failure programs in the Intermountain West, Northeast and Midwest. Her career has combined direct patient care with program development, fellowship education, quality improvement, clinical research and the leadership of multidisciplinary teams caring for people with complex cardiovascular disease.

Before joining UofL Health, Dr. Moore spent two decades on the faculty of Harvard Medical School and held progressive clinical and leadership roles at Massachusetts General Hospital. Her work there included advanced heart failure and transplant care, fellowship leadership, quality initiatives and cardiac telemonitoring. Earlier appointments at the University of Massachusetts and University of Utah helped shape a career focused on building strong programs, mentoring clinicians and making highly specialized care more coordinated and humane.

Dr. Moore earned a Bachelor of Science in Pharmacy from The Ohio State University and her medical degree from the University of Cincinnati. She completed residency training in internal medicine at the University of Cincinnati and a cardiovascular disease fellowship at the University of Utah. She is board certified in Internal Medicine, Cardiovascular Disease, and Advanced Heart Failure and Transplant Cardiology.

Her scholarly work spans advanced heart failure, mechanical circulatory support, cardiac transplantation, biomarkers and quality outcomes. Her supplied professional record includes more than 30 peer-reviewed publications, participation in multicenter clinical trials, journal review work and contributions to professional committees and guidelines.

Today, Dr. Moore is expanding that experience into public health education, media, speaking and consulting. Her message is simple: surviving a medical crisis can be extraordinary, but prevention and long-term vitality deserve the same urgency. Through evidence-based guidance on movement, nutrition, connection, resilience and cardiovascular risk, she helps audiences understand what the science means for everyday life.
